

Ananta Kumar Mohanta

Senior Data & Analytics Professional (Banking, Data Migration, Risk & Automation)

Ghaziabad, India | ananta.mohanta2730@gmail.com | +91 9591491751

PROFESSIONAL SUMMARY

Senior Data & Analytics professional with nearly 8 years of experience across banking, data migration, risk, fraud analytics, data governance, and enterprise analytics. Strong expertise in SQL, Python automation, data quality frameworks, data profiling, and reconciliation, with hands-on experience supporting legacy-to-target migration initiatives and developing Source-to-Target Mappings (STTM). Proven ability to bridge business and technical teams, investigate migration and data quality defects, automate large-scale validation workflows, and deliver reliable data solutions in regulated banking environments.

CORE SKILLS

Data Migration & Governance: Legacy-to-Target Migration, Data Profiling, Data Quality, Source-to-Target Mapping (STTM), Reconciliation, Defect Analysis, Root Cause Analysis

Banking & Domain: Core Banking, Finacle, Risk, Fraud Analytics, Regulatory Reporting, Compliance Analytics, Banking Data Governance

Data & Analytics: SQL, Python, Power BI, Tableau

Automation & Engineering: Python Automation, Parallel Processing, Workflow Optimization, Reporting Automation

Databases & Platforms: Oracle 11g, MS SQL Server, Azure SQL, Salesforce DB, Azure Data Lake

Cloud & Tools: Azure, AWS, Databricks, Money Guide, SOQL, JIRA

Methodologies: Agile / Scrum, BAU Support, STTM, Stakeholder Management

PROFESSIONAL EXPERIENCE

Senior Analyst – Data & Analytics

NAB, Gurugram | July 2025 – Present | Project: Enterprise Data & Analytics

- Support enterprise banking applications through regular BAU data refreshes, ensuring timely and accurate backend data availability for dashboards.
- Design and maintain end-to-end dashboard data pipelines, covering ingestion, transformation, and refresh logic based on business requirements.
- Build and enhance analytical dashboards for operational and management reporting across multiple NAB applications.
- Partner with stakeholders to translate reporting needs into scalable data models and dashboard designs.
- Monitor data quality and resolve refresh or data consistency issues by coordinating with upstream data teams.

Senior Consultant – Data & Analytics

EY (GDS), Noida | January 2023 – July 2025 | Project: Data Governance | Client: Edward Jones

- Delivered data governance and data migration solutions supporting migration from legacy platforms to Salesforce and Money Guide.
- Ensured data quality across accuracy, completeness, and validity dimensions during cloud migration initiatives.
- Performed data profiling across raw and analytical zones and developed Source-to-Target Mappings (STTM) for multi-hop architectures.
- Performed source-to-target data reconciliation, identified migration defects, and logged issues in JIRA for tracking and resolution.
- Automated large-scale data validation, profiling, and reconciliation workflows using Python and parallel processing.
- Built Power BI and Tableau (POC) dashboards to monitor data quality metrics and anomalies.
- Reviewed SQL Server stored procedures, SSIS packages, views, and Databricks workflows to validate transformation logic and alignment with migration requirements.
- Built Python-based parallel processing automation to optimize large-scale data validation and reconciliation, leveraging AI-assisted development tools.
- Developed a Python automation solution to scan enterprise emails and identify AI training completion confirmations, generating automated weekly compliance and progress reports for stakeholders.

Senior Business Analyst

LTIMindtree (L&T; Infotech), Mumbai | January 2022 – January 2023 | Project: Data Quality Platform | Client: Citi Bank

- Supported a regulatory-focused Data Quality (DQ) platform as a Business/Data Analyst.
- Executed complex SQL queries to extract and validate risk and financial data for regulatory reporting.
- Identified data quality rule failures through analysis and collaborated with technical teams for remediation.
- Conducted data profiling and supported delivery of the DQ platform UI.
- Assisted in building Tableau dashboards for data quality monitoring and reporting.

Data Analyst

ICICI Bank Ltd, Hyderabad | October 2017 – January 2022 | Project: Banking Data Analytics & Risk Management

- Extracted and analyzed customer, account, and transaction data directly from the Finacle core banking system using SQL to support fraud, risk, and operational analysis.
- Conducted root cause analysis on operational and fraud-related issues and collaborated with business and development teams on remediation.
- Analyzed fraud patterns and supported implementation of risk-based fraud triggers.
- Prepared regulatory reports and assisted in fraud case reporting to the RBI.
- Designed Power BI dashboards for fraud monitoring and risk insights.
- Supported CRM analytics, customer risk profiling, and Net Promoter Score (NPS) analysis.
- Contributed to Staff Account Monitoring (SAM) initiatives to detect internal fraud and ensure compliance.

EDUCATION

Post Graduate Diploma in Banking & Finance – Bangalore, 2017

Bachelor of Technology – Gunupur, 2015
